

# 5G RF Planning and Design

**5G\_302x | Expert-Led Live | 5G Access | Expert**

**Course Duration:** 3 days

This course takes an in-depth look at the RF planning and design aspects of 5G. It summarizes the essentials of the 5G air interface. MIMO and beamforming in 5G and suitable propagation models are discussed. The link budgets for 5G for different scenarios are calculated and compared with the LTE link budget. The RF cell configuration and RF operational parameters are discussed. Finally, the overall process of the RF design for 5G is described including traffic mapping and propagation modeling. The use of an RF planning tool to carry out the RF design is illustrated.

## Intended Audience

This detailed technical course is intended for design, engineering, performance optimization and related job functions.

## Objectives
